- Requirements and Framework

WHAT IS REDISTRICTING?

- Redistricting in the United States is the process of drawing electoral district boundaries.
- Redistricting happens every 10 years as a result of the new census numbers; addresses changes in the population.

Dear Resident

THE IMPORTANCE OF REDISTRICTING

- Representation on local level positions
- Representation matters
- Takes place citywide, countywide, statewide and nationally

6 Things to Consider When Redrawing the Lines

1 Equal Population

Each Council District should contain roughly 1/9 of the city's population.

2 Contiguity

Council Districts should be composed of contiguous territory.

3 Geographically Compact

Council Districts should be geographically compact so nearby areas of population aren't bypassed for more distant populations.

4 Communities of Interest

Council Districts should try to preserve communities who have similar legislative concerns who could therefore benefit from cohesive representation.

5 Reasonable Access

Council Districts should provide reasonable access between population centers.

6 Natural Boundaries

Council Districts should be bounded by natural boundaries, street lines and/or City boundary lines.
